

LOKMAN BIN KHODZIRI

Aspiring Fullstack Developer · React · Node.js · Java Spring Boot

Penang, Malaysia · lokmankhodziri@gmail.com · linkedin.com/in/lokmankhodziri · github.com/lokmankhodziri · lokmankhodziri.com

PROFESSIONAL SUMMARY

Final-year Information Technology student with hands-on project experience building fullstack web applications using React, TypeScript, Next.js, Node.js, and Java Spring Boot. Shipped live products including a Muslim-friendly travel planner (Musafir-Go), a client resort marketing site, and a PC parts price comparison platform for the Malaysian market. Background in engineering brings strong problem-solving discipline and a systematic approach to software development.

TECHNICAL SKILLS

Frontend

React.js, Next.js, TypeScript, Vite, HTML5, CSS3, TailwindCSS, Responsive Design

Backend

Node.js, Express.js, Spring Boot (Java 17), REST API Design

Databases

MySQL, MongoDB, PostgreSQL, Firebase, Prisma ORM

DevOps

Docker, Docker Compose, Jenkins, GitHub Actions, Nginx, Linux (Debian/Ubuntu)

Deployment

Vercel, VPS (Linux), CI/CD Pipelines

Languages

JavaScript, TypeScript, Java, Python

Concepts

JWT Auth, OAuth, RBAC, MVC Architecture, RESTful Design, Agile/Scrum basics

Tools

Git, GitHub, Postman, VS Code, IntelliJ IDEA

PROJECTS

Musafir-Go – Muslim-Friendly Travel Planner (Final Year Project) – Next.js · Express · Prisma · PostgreSQL · OAuth

Built and deployed a live travel planner with day-by-day itineraries, prayer times, nearby halal/mosque discovery, and trip expense tracking

Implemented Google/GitHub OAuth and JWT sessions via Express + Passport; modeled trips, activities, and locations with Prisma on PostgreSQL

Integrated Google Maps, Aladhan prayer API, and responsive Next.js UI with admin reporting dashboard

🔗 **Live Demo:** musafirgo.vercel.app

Bebilis Yard Demo – Client Marketing Website – React · TypeScript · Vite · TailwindCSS · Vercel

Delivered a responsive marketing demo for a real resort client with reusable section components and mobile-first layout

Built product-focused pages (rooms, activities, gallery, location) with WhatsApp booking integration

Deployed on Vercel with optimised bundle size and scalable architecture for future booking/admin features

🔗 **Live Demo:** demo-bebilis-yard.vercel.app

CariPart – PC Parts Price Comparison (Malaysia) – Next.js · MongoDB · Prisma · Clerk · TanStack Query

Built a fullstack price comparison platform for Malaysian marketplaces (Shopee, Lazada) with public dashboards and trend charts

Designed CSV/JSON ingestion pipeline with Zod validation and title normalization into canonical product aliases

Implemented Clerk RBAC (viewer/contributor/admin), MongoDB + Prisma data layer, and Tremor analytics for MYR price trends

🔗 **Live Demo:** caripart.vercel.app

EDUCATION

Bachelor's Degree in Information Technology | Open University Malaysia (OUM) | *Expected 2027*

Diploma in Electronics (Communication) | Politeknik Tuanku Syed Sirajuddin | *2013 – 2017*

PROFESSIONAL TRAINING

Java Full Stack Development Programme | Train2Place (MyMahir Programme) | *Jul 2025 – Aug 2025*

- Built fullstack applications with Spring Boot, React, and MySQL; implemented JWT authentication
- Applied Docker, Docker Compose, and Jenkins CI/CD pipelines in a structured training environment

PROFESSIONAL EXPERIENCE

Product Development Technician II | TF-AMD Microelectronics | *Aug 2024 – Present* · Malaysia

- Streamlined data analysis workflows, reducing reporting turnaround time by 15% through process improvements
- Documented technical troubleshooting procedures, cutting testing cycle time by 10%
- Collaborated across cross-functional engineering teams in a high-pace production environment

Assistant Process Engineer | Jinko Solar | *Oct 2022 – Jan 2024* · Perai, Penang

- Increased production yield by 12% through targeted process optimisation and data-driven root cause analysis
- Reduced equipment downtime by 20% through systematic fault-finding and preventive maintenance improvements
